SPACE4IMPACT INITIATIVE

At Space4Impact (www.space4impact.org) we believe that space can do more for the Earth.

Space4Impact creates an ecosystem of governmental and non-governmental organisations, investors, entrepreneurs & corporates to maximize the positive impact that space technologies, infrastructures and data can bring to our planet for a sustainable future.

Through the PROMOTE and the CONNECT activities we:

- raise awareness on how space technologies, data and infrastructure can provide positive societal/ environmental impact at a national and international level
- build bridges between the stakeholders of the Space4Impact ecosystem
- help New Space companies to grow and enter new markets
- answer organisations and corporates needs through identification of space based solutions

PROMOTE:

Space4Impact official kick-off event will take in Lausanne, Switzerland (25-26 November 2020), bringing together policy makers, investors, NewSpace entrepreneurs & corporates that do not yet leverage on space technologies to achieve their sustainability and resilience goals.

Ten selected start-ups will have the opportunity to pitch at the Space4Impact kick off event. The international call for startups is open until the 20th September 2020. All registered companies using or developing space technologies in alignment with the UN SDGs are invited to apply [here](#).

Through panel discussions, workshops and the pitch contest, the scope of the two-days kick off event is to trigger discussions between the participants and to define the next actions of a joint roadmap.

CONNECT :

Space4Impact answers international corporations needs with specific space technologies & drives the new space sector worldwide by running pilot projects linking NewSpace companies with non-space industrial verticals and try to attract new capitals to the NewSpace field.

Space4Impact is a non-profit organisation and is supported by the Swiss Space Center, the ESA BIC Switzerland and AP-Swiss.

Space4Impact initiative current kick-off event partners are the Swiss Federal Department of Foreign Affairs, the Swiss Canton of Vaud and the EPFL Tech4Impact initiative.
